

Hydrogen Europe: European Hydrogen & Fuel cell Project Database

Project CHIC

Clean Hydrogen in European Cities

The Clean Hydrogen in European Cities (CHIC) Project is the essential next step to full commercialisation of hydrogen powered fuel cell (H2FC) buses. CHIC will reduce the 'time to market' for the technology and support 'market lift off' – 2 central objectives of the Joint Undertaking. CHIC will: - Intensively test the technology to generate learning for the final steps towards commercialisation by operating a minimum of 26 H2FC buses in medium sized fleets in normal city bus operation, and substantially enlarging hydrogen infrastructure in 5 European regions. - Embed the substantial knowledge and experience from previous H2FC bus projects (CUTE & HyFLEET:CUTE). - Accelerate development of clean public transport systems in new European Regions. - Conduct a life cycle based sustainability assessment of the use of H2FC buses in public transport, based on a triple bottom line approach considering environmental, economic and social aspects. - Identify the advantages, improvement potentials, complementarities and synergies of H2FC buses compared with conventional and alternative technologies - Build a critical mass of public support for the benefits of 'green' hydrogen powered transport, leading to increased visibility and political commitment across Europe. The project is based on a staged introduction and build-up of H2FC bus fleets and the supporting infrastructure across Europe. A phased approach will link experienced cities and new cities in partnerships, greatly facilitating the smooth introduction of the new systems now and into the future. Using this arrangement the project will be linked to other projects fully funded from other sources and therefore magnifies the impact of the JTI. In the context of the H2FC bus projects and progress achieved to this point, the expected results of CHIC will take the technology to the brink of commercialisation, leading in turn to very significant environmental & economic benefits to Europe and to the World.

Project Information

Type of project : Demonstration

Timing : 01/04/2010 > 31/12/2016

Project website: <http://chic-project.eu/>

Project Budget : 81.956.227 €

Funding

European Union through FCH JU: Grant agreement 256848 - [CORDIS link](#)

Project partners

Coordinator :

EVOBUS GMBH

Partners :

CHIC

Air Liquide

Linde

Shell Downstream Services International B.V.

Vattenfall GmbH

AZIENDA TRASPORTI MILANESI

BERLINER VERKEHRSBETRIEBE

ELEMENT ENERGY LIMITED

EURO KEYS SPRL

HyCologne - Wasserstoff Region Rheinland e.V.

HYDROGEN, FUEL CELLS AND ELECTRO-MOBILITY IN EUROPEAN REGIONS

INFRA SERV GMBH & CO. HOCHST KG

BRITISH COLUMBIA TRANSIT

LONDON BUS SERVICES LIMITED

THINKSTEP AG

PLANET PLANUNGSGRUPPE ENERGIE UND TECHNIK GBR

POSTAUTO SCHWEIZ AG

Spilett new technologies GmbH

SUEDTIROLER TRANSPORTSTRUKTUREN AG

TOTAL DEUTSCHLAND GMBH*TD

UNIVERSITAET STUTTGART

RUTER AS

Wrightbus Ltd

CENTRO RICERCA FIAT SCPA

hySOLUTIONS GmbH

Sub project(s)**Sub project 1****Country:** Germany**Address:**

VAIHINGER STRASSE 131 70546 STUTTGART

Sub project categories

Demonstration

Project Id: 930
