Project Don Quichote

Demonstration Of New Qualitative Innovative Concept of Hydrogen Out of windTurbine Electricity

The project “Don Quichote” aims at the long-term demonstration of the readiness of the technology of the combination of renewable electricity and hydrogen; facts-based data generated in this project is the base for analysis for further deployment and implementation of combined systems “renewable electricity – hydrogen”. Linked to the technical demonstration emphasis will be put on analysis of regulation, codes, standards, on LCA/LCI, on total cost of ownership and on implementation ways all over Europe.

Project Information

Type of project : Demonstration

Timing : 01/10/2012 > 31/03/2018

Project website: <http://www.don-quichote.eu/>

Project Budget : 4.946.134 €

Funding

European Union through FCH JU: **Grant agreement 303411 - CORDIS link**
